DENTON CLARK
— BUILDING SURVEYING —

Brookside Farm, Pulford Agricultural Development

Winner of the CLA North West Rural Building Award in 2007.

Our brief was to design and build a state-of-the-art dairy unit on a 309 hectare farm near Chester, consolidating excess buildings and selling off surplus buildings to turn the farm into a modern, efficient and profitable business.

We were involved from inception through construction to a successful conclusion. This included all planning negotiations, design of the 12,300 m² cubicle building which contained a 60 point rotary parlour, flood washing system, separator, 25 million litre slurry lagoon and 15,000 tonne silage clamp. New homes were also created from the old farm buildings and subsequently sold by the Denton Clark Estate Agency department.
